

## N6CM Homebrew 100W External K2 PA

Bob, N6CM, [rfriess@dsldesigns.net](mailto:rfriess@dsldesigns.net), has built a neat external 100W PA for the K2. It uses an RF deck from **Communication Concepts, Inc.** and his design for the LPF and control circuits.

The PA uses diodes for T/R switching with an adjustable QSK delay.
