Using the KXPD3 Paddle on the KX2

Revision A, May 17, 2016

E740296

Copyright © 2016, Elecraft, Inc., All Rights Reserved

⚠ CAUTION!

To avoid damaging your KX2, check the thumb screw lengths as shown below before mounting the KXPD3 paddle on your KX2.

Older KXPD3 paddles have one long and one short thumb screw as shown below. The long thumb screw must be replaced to avoid damaging the KX2. The thumb screws are simply threaded through the paddle body and are easily unscrewed.

You can obtain the additional short thumb screw required from Elecraft. Order E700245.
