Outpost 3.7.17 Changes

SCCo Ver	Topic	ER#	Cplx	Class	Reported By	Problem / Issue	
162K	ICS309	1727A	M	Defect	Thomas KK6FPP	Corrects datetime conversion problem in report file	
		1740	M	Enhance	Judy KK6EWQ	Checks for a message log file change and reloads.	
		1742	L	Enhance	Thomas KK6FPP	Adds ICS309 check if the e-signature flag is not set.	
		1744	M	Defect	Jeff AJ6XZ	Resolves Operational Period time incorrectly set, now this is a user-entered field.	
	Message	1745	M	Defect	Thomas KK6FPP	Resolves incorrect replacement of "++" Msg ID flag in message body.	
		1746	H	Defect	Thomas KK6FPP	Corrects handling of line termination on message content.	
	Script Send/Receive	1741	L	Defect	Jim KN6PE	Resolves Script Setting form not accepting change	
		1747	H	Enhance	Jim KN6PE	Support decoding quoted-printable Incoming winlink messages.	
	162F	About	1613	L	Enhance	Jim K6JRC	Adds enhanced version information to Outpost > About when addons are included.
		Addons	1695	H	Enhance	Andreas K6OTT	Allows Addon data block !tag! to start on any line in the file, first column.
Agwpe		1717	M	Enhance	Thomas KK6FPP	Makes AGWPE transmit buffer configurable (currently defaults to 128).	
BBS		1689	H	Enhance	Michel VE9JFL	Supports 'English (Canada)' KPC3P date/time format for LM commands to resolve a date parsing issue.	
		1726	H	Defect	Jeff WA4ZKO	Resolves handling of the BPQ UTC message year not being correctly set	
ICS309		1567	L	Defect	John W6JMK	Fixes ICS 309 double-quoted names when printing to a .csv file.	
		1690	L	Enhance	Jim KN6PE	Upgrades ICS 309 form fonts for readability.	
		1694	M	Defect	Kevin KK6VF	Resolves ICS309 failing to pick up Outpost print setting, task name, and others with "-" imbedded in the string.	
		1705	L	Enhance	Jim KN6PE	Makes ICS 309 field name changes to align with ICS standard terminology.	
		1724	M	Enhance	Mark K6FJC	Adds an ICS 309 option to add an e-signature to the .pdf version of the ICS 309 report.	
Ipserial		1727	M	Enhance	Michel VE9JFL	Supports ISO 8601 date/time format ('English (Canada)', yyyy-mm-dd) for ICS309 when selected.	
		1701	M	Enhance	Jim KN6PE	Changes Ipserial logging to a fixed log file name (ipserialymmdd.log) that is always on. Remove manual logging controls.	
		Main Form	1700	L	Enhance	Jim KN6PE	If pressing Outpost > Exit, allows prompt to cancel exit.
1713			M	Enhance	Mark K6FJC	Adds option > SR Settings > Other > "Show Connection Status..." option to turn off S/R Stating to prevent the main form from coming to the top.	
Message		1728	M	Enhance	Jim KN6PE	Adds ability to run a program on startup	
		1108	L	Enhance	Jim KN6PE	Corrects JNOS insertion of a carriage return at 127 characters.	
		1621	L	Defect	Thomas	REVISIT: Trap Edit/Copy/Cut/Paste 521 error everywhere	
		1688	H	Defect	Thomas KK6FPP	Resolves Outpost treating the Path: sub-header from JNOS as the Addon ID (tied at #1695).	
		1706	M	Enhance	Jim KN6PE	Adds an option to display ALL messages regardless of where they are.	
		1707	M	Enhance	Jim KN6PE	Adds Outpost > Search feature, then display those messages that match the entered search criteria.	
1708	M	Defect	Jeffrey N6ADE	Resolves situation where double or triple clicking on the body of the message creates an error (as if you wish to highlight the entire message).			
1719	M	Enhance	Judy KK6EWQ	Adds Outpost > Actions control to set a message to READ status without actually opening it.

		1699	L	Defect	Tim KE6TIM	Restricts Station ID form from creating a call sign in lower case.
		1720	M	Enhance	Steve KC6RSC	Adds Station ID form option to transmit a text after the send/receive session for Call Signs.
		1737	M	Enhance	Thomas KK6FPP	Removes validation check that excludes SSID calls
	Grand Total					

SCCo Installer 162M
PackItForm 3.13 changes

Release	Description
3.13	Correctly deliver a Shelter Status form in which 'Managed By: Other' is checked, but there's no associated value. (In previous versions, the delivered message showed nothing checked.)
3.13	After submitting a check-in/out form, show the same call sign and user name that the user entered. (Previous versions showed the default call sign and name. The correct values were delivered to the message recipient.)
3.13	Enable manual operators to print a simulated signature in the ICS-309 comm log.
3.13	Enable manual operators to save an incomplete ICS-309 comm log (with required fields not filled in).
3.13	The Shelter Status form looks more like the PDF form, with radio buttons instead of drop down menus.
3.13	The Mutual Aid Request, Resource Request and Medical Resource Request forms have a new 'with signature' checkbox.
3.13	Multiple spaces entered into a form field are shown as multiple spaces (not a single space) in the received form.
3.13	Manual operation (using a terminal emulator instead of Outpost) is better supported. Specifically: <ul style="list-style-type: none">* Timestamps, message numbers and the user's call sign are filled in automatically.* An ICS-309 log is maintained. It can be edited, printed and downloaded to a CSV file.* A complete BBS command to send a message is provided.
3.13	the ICS-309 log entry for a manually received message shows the sender's tactical call sign, instead of their personal call sign
3.13	Uninstalls the Cover Sheet form
