

City and County, Now how do they operate?

Fundamentals of Emergency Communications

Can you describe all of the major nets used within Santa Clara County? Do you know which nets are used for mobilization and message passing? Can you describe the three operational levels of the Resource Net and the procedures for each level? Do you understand how all of the fields of the Message form are to be use? Do you know what you need in order to get started as a net control? This Fundamentals course covers basic operating principles that Santa Clara County hams responding as DSWs should know and understand.

This is the second of two basic classes designed to get new hams feeling comfortable with city and county operating procedures. It is also an excellent introduction for experienced hams who are new to Santa Clara County operations and an excellent refresher for experienced Santa Clara County hams as well.

This class is **not** designed to help you pass any ham radio test.

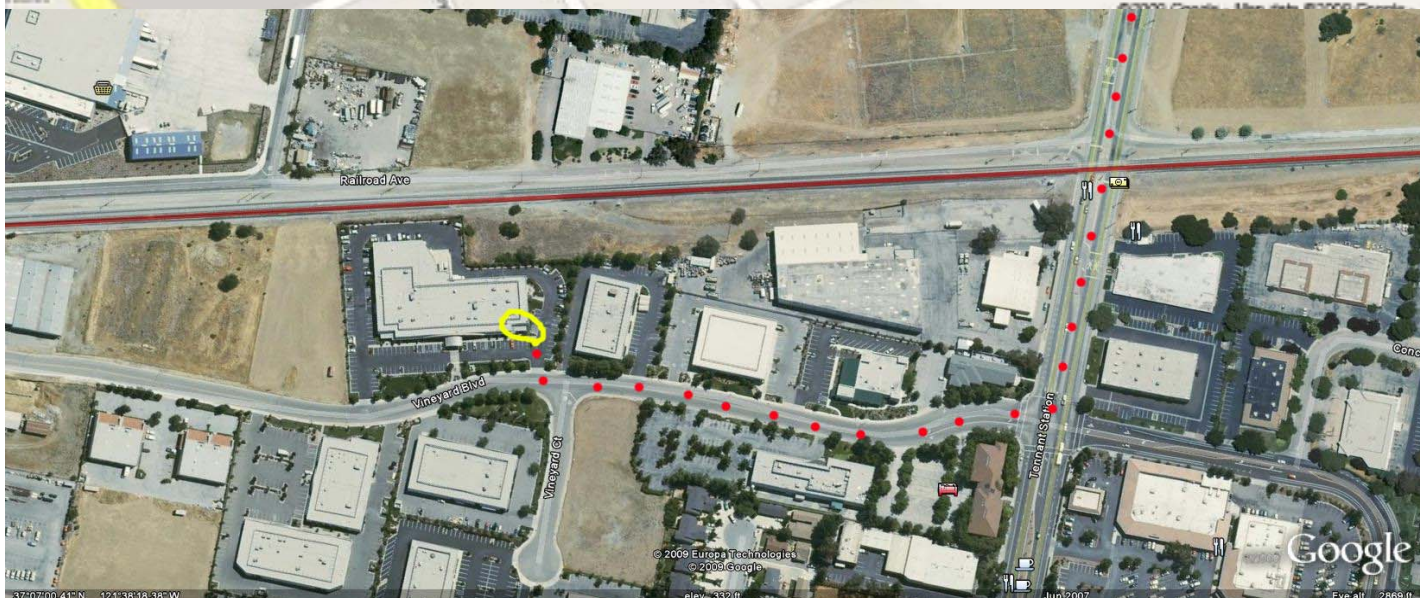

- When:** Saturday, March 20, 2010 - Registration: 8:00 am - Class: 8:15 am to Noon
- Where:** Morgan Hill Police Department, Large Conference/Training Room – 16200 Vineyard Blvd., Morgan Hill. Thomas Guide Map Page – 937 B2
